REQUIREMENTS FOR SURGERY

Pets must be in good health. **HIGH RISK surgeries cannot be performed in our clinic.**

Pets must be at least 9 weeks old and weigh no less than 4 pounds and no dogs over 80 pounds. No animals over 10 years of age.

I understand that it takes up to two weeks for vaccinations to protect the animal & I [client must initial one of the options]:

_____ certify that the Animal has been vaccinated within one (1) year prior to this date (written proof of vaccinations will be required); or

_____ request recommended vaccinations at the time of surgery, as selected above, with the knowledge that the Animal will still not be protected. I certify that the Animal has not bitten anyone in the last ten (10) days.

I understand that the operation I have elected presents some hazards, & that injury to, post-operative infection in, or death of, the Animal may conceivably result, for there is some inherent risks in the procedure & in the use of anesthetics & drugs provided for the procedure, as well as any vaccines used. I understand that general anesthesia will be administered to the Animal for surgery, I understand & accept these risks to the Animal.

I understand the inherent risks of failing to maintain current vaccinations & waive all claims arising out of, or connected with, an illness contracted post-surgery, including, but not limited to kennel cough or other upper respiratory infections. I am responsible for treatment at my own cost.

I understand that BAF &/or any BAF Party has the right to refuse any service &/or procedure at any animal for any reason, including but not limited to, situations where surgery is deemed a health risk. Such refusal is at the sole discretion of the attending veterinarian.

I understand that a pre-surgery exam will be performed on the Animal when possible, but that there are times, in the attending veterinarian's sole discretion, when such an exam may only be performed after the animal has already been sedated or anesthetized. I understand that the Animal will not receive pre-operative bloodwork at the clinic. If I choose for the Animal to have such bloodwork, I understand that it must be performed at a full-service veterinary clinic.

I understand that if the Animal is an acceptable surgical &/or vaccination candidate, sterilization procedures &/or vaccinations will be performed regardless of the Animal's gender &/or medical condition, including but not limited to, pregnancy. I understand if the Animal is pregnant, the pregnancy will be terminated at surgery.
